Naval

Places of Naval Interest in the SWINOUJSCIE Channel.  
(1950 and as in text) ~~XXXXXXXXXX~~

Below is a key to the attached photostat of SWINOUJSCIE Channel:-

- 1 - Soviet Naval Base which usually contains minesweepers and M.T.B.s but sometimes submarines and destroyers. In July 1954 there was a greater number of small Soviet vessels than usual in the basin.
- 2 - A coaling station in which 2 new cranes have been recently installed. Foreign merchant ships as well as Soviet and Polish vessels coal at this station.
- 3 - 2 3-ton travelling cranes behind which are 2 buildings and some stores. At times a Soviet naval vessel is tied up near the cranes. A Soviet naval guard is posted over the cranes.
- 4 - Area containing Soviet naval storehouses.
- 5 - Entrance to a small canal which could take a small vessel or a submarine.
